Objective

Motivated Junior data Analyst with expertise in data management and analytics, seeking to contribute to the Engineering Operations team by leveraging skills in Data Science, MySQL, Tableau , and dashboard development. Enthusiastic about supporting data-driven decision-making in a dynamic environment.

Summary

Detail-oriented data professional with expertise in managing semiconductor tool budgets, materials planning, and operations management. Skilled in data mining, blending, and visualization with a focus on process streamlining and data-driven decision-making. Proficient in developing corporate business tracking tools and executing complex analysis to provide actionable insights.

Skills

- Data Analysis: Data Cleaning, Data Mining, Exploratory Data Analysis (EDA)
 - Data Integration: Python-MySQL Integration, SQL Queries, Data Extraction
 - Data Visualization: Tableau (Dashboards, Storytelling, Reporting)
 - Programming: Python (Pandas, NumPy, Seaborn), MySQL, GitHub, Jupyter Notebook, HTML, CSS
 - Office Tools: MS Office, Adobe Photoshop
 - Machine Learning: Supervised/Unsupervised Learning, Regression, Scikit-learn, Flask for ML deployment
 - Technical Skills: Data Modeling, Data Validation, Integrity, Transformation, Time Series Analysis
 - Soft Skills: Problem-solving, Team Collaboration, Communication
-

Education

M.Sc. in Data Science | Birchwood University (2024)
B.Sc. in Chemistry | National University (2013)

Work Experience

Data Coordinator (Technical Operations Focus)

Applied Materials, Austin, TX | Sep 2021 – Present

- Managed material data for semiconductor parts, tracking inventory and shortages across locations.
- Worked with teams to resolve data issues, optimizing workflows and reducing processing time by 10%.
- Cleaned data using Python, improving accuracy by 15% for semiconductor analysis.
- Used MySQL for managing datasets, boosting data retrieval efficiency by 20%.
- Built Tableau dashboards for sales, production metrics, and customer segmentation.
- Created data reports for management, offering insights into supply chain performance.
- Supported data validation to ensure consistency across semiconductor databases.

Data Support Specialist

Luminex Corp, Austin, TX | July 2020 – June 2021

- Supported data validation and cleaning, ensuring 98% data accuracy.
- Conducted data analysis using Excel, generating actionable reports.
- Assisted in developing data-driven insights to optimize inventory management and sales strategies.

Data Collection Specialist

AirBorn Inc, Georgetown, TX | February 2019 – July 2020

- Collected and managed data, improving inventory management by 25%. Created Excel reports to highlight key trends in supply chain data.

Additional Experience:

IT Technician : Build A Sign, Austin, TX

| Jan 2017 – Feb 2019

- Provided technical support for data systems. Maintained inventory data accuracy.

Web Designer : Uding Inc., Barisal, Bangladesh

| Feb 2009 – Nov 2015

- Managed web content, gaining experience in HTML and CSS.
-

Projects

Sales Performance and Trends Analysis

- Developed a comprehensive Tableau dashboard showcasing sales performance, customer segmentation, and product analysis.
- Conducted data cleaning using Python (Pandas) and integrated MySQL for large dataset querying.
- Created visualizations for sales trends, product category sales, and geographical insights.

Bank Customer Data Analysis

- Built an interactive Tableau dashboard for customer demographics and regional distribution.
- Utilized Python for data preprocessing and MySQL for customer data management.
- Highlighted customer segmentation based on spending patterns and job classifications.

Retail Sales Insights

- Designed a Tableau dashboard focusing on sales insights, product performance, and segmentation.
- Performed data wrangling in Python and used MySQL for complex queries.
- Visualized sales, shipping performance, and regional analysis in Tableau.

Customer Data Insights

- Created a Tableau dashboard to analyze customer behavior, sales performance, and profit margins.
 - Cleaned and transformed raw e-commerce data using Python, extracting data with MySQL.
 - Provided a detailed view of category-wise sales and yearly sales trends.
-

Certification & Professional Development

Diploma in Computer Science & ICT, SIT Foundation, Bangladesh — December 2010

Software Testing and Automation Course, NextTech ITC, Irving, TX — 2021

CompTIA A+ Complete Study Guide (Course & Labs), The Goodwill Academy — May 7, 2018

CompTIA IT Fundamentals, austinfree.net, Austin, Texas — March 19, 2018
